

**MOTIONER till SULF vid Göteborgs universitets årsmöte
tisdagen 3 februari 2026.**

MOTION 1:

1. That SULF at the University of Gothenburg shall work to improve employment security and ensure fair and transparent salary development for postdoctoral researchers, including those employed on short-term contracts dependent on external research funding.
2. That SULF at the University of Gothenburg shall work to strengthen support for postdoctoral researchers who wish to transition to careers outside academia, including career guidance and recognition of transferable skills.

MOTION 2:

Motion: A discussion to fighting the legality of suing employees for unnoticed payment errors occurring several years previously. A suggested cut off for how many years they can reclaim this money should at the very least be the same time that refunds for taxes paid on this money are no longer capable to be reclaimed.

A very large number of employees have recently faced this issue as the errors were uncovered with the application of a new AI system.

The accuracy of this systems' reporting should also be questioned.
